I have to say I am dissapointed, not because of the quality, because that is GOOD and recommended. I am dissapointed because it says in the description what you get, and it isnt true. Instead of 21 facesets, i get 20. 70 backgrounds is right. Not right amount of enemies, the description says 96 battlers, i get 70, plus 15 animals (but only with movement chars.) And more things, is not what is advertised, it is LESS.. I don't know whether I should vote this graphics pack up or down. The ambition to make Western-looking games possible in RPG Maker is commendable, and the setting tilesets and background scenes are really nice; but the character sprites and portraits are tacky. They were made from free stock assets in the free version of DAZ Studio, and sometimes you get what you pay for. If you recognize the name "DAZ Studio", you probably don't need to buy this package, at least not for the sprites. A recent version of Poser, a decent amount of familiarity with it, and a good inventory of characters,

outfits, and hairstyles (total price, probably $500-$1000) are enough to create better sprites and portraits than this. But if you'd rather spend $25 than $1000, and the poor lighting on the character sprites in the preview doesn't bother you, this is probably the way to go.. This isn't bad.. I am very disappointed to find a spelling mistake in the iconset, gaurd? really? Also you cannot mix the terrain for water for instance if you make a pool with sand around it and then put sand terrain around the pool, there will be a ring of grass. Other than that you get lots of content. Ill change my review when the dev fixes these problems.. An awesome variety of assets for use in a semi-realistic medieval-fantasy setting. Almost enough to build an entire game graphically.
